

What my code does:

I give the user to date entries. Check to make sure they are dates and then find the difference between the two date in days hours and minutes.

1. User enters value
2. Ensure values are dates
 1. Years
 2. Months
 3. Days
3. Subtract date one from date two
4. Calculate difference between two dates
 1. Days
 2. Hours
 3. Minutes
